

App. No. 10/065,749

In the Specification:

Examiner's item number 4.

requests
Applicant ~~request~~ that the title be replaced with the title suggested by the Examiner.

Please replace the Title with the following:

"Server Centric Development platform supporting multiple languages and technology"

Examiner's item number 5.

these
Applicant's Attorney has used ~~there~~ trademarks to identify the actual products with the nature of the marks being respected and are not used in any manner which adversely affects their validity as trademarks, Java, Oracle and J2EE are specific computer languages that only can be referenced by their names as well as their applications, processes and compiler. CompuServe, Prodigy, American Online, Netscape are specific applications to access the Internet. As the Examiner has said, trademark can be used in an application.

changing
To address the Examiner's concerns, Applicant is ~~change~~ the name of the J2EE Center to the functionality Center throughout the application.

Please replace the Abstract with the following:

"The invention is an integration of development tools functionality--source code management, compilation, running etc on the server side. The invention is centralized. The way the existing invention works is that different tools provide different features for the various things the developer needs to do. It's a single product giving the functionality of different tools. The main components are Account, Users manager, Project manager, Source code compilation and run-time management, Repository Manager, Datasource Manager, J2EE Functionality Center, The Requirements and Analysis center, The DrawBoard, Productivity Wizards, and The NCStudio client."

Please replace Paragraph 21 with the following:

"6. J2EE Functionality Center,"

App. No. 10/065,749

Please replace Paragraph 40 with the following:

"f. J2EE Functionality Center. This component handles the J2EE/Webservices related functionality for the user 10. This functionality includes but is not limited to create, modify, delete, deploy various J2EE components like EJB Jar, WAR and EAR."

Examiner's item number 6.

Examiner's requested corrections of "Liuns" and "central" have been corrected per Examiner's request.

Please replace Paragraph 49 on Page 8 with the following:

"The Users 10 contact the central server 30 using an informational processing system capable of running an HTML compliant Web browser such as Microsoft's Internet Explorer, Netscape Navigator, Lynx or Mosaic. A typical system that is used is a personal computer with an operating system such as Windows 95, 98 or ME or Linuxs, running a Web browser. The exact hardware configuration of computer used by the Users 10, the brand of operating system or the brand of Web browser configuration is unimportant to understand this present invention. Those skilled in the art can conclude that any HTML (Hyper Text Markup Language) compatible Web browser is within the true spirit of this invention and the scope of the claims."

Please replace Paragraph 52 on Page 8 with the following:

"The central server 30 has the following components contained on it within its memory and being able to be run by the workstation 10, the repository 42, Projects 44, component builder and deployer 46, debugger 48, source control 50, java compiler 52, java runtime 54, J2EE application server 56 and DB Manager 58."

A clean version of the Specification is attached.
